

Ooredoo Tunisia Bill Generation Solution Request for Proposal

Abstract: The purpose of this RFP is to solicit responses from identified vendors to provide a bill generation solution based on the requirements identified in this document. Budgetary estimates are required.

All information in connection with this RFP and project is strictly confidential.

Only the official stakeholders of the project are entitled to consult this document or to intervene in the different phases of the project according to the limits of their scope of actions.
The unlawful copying, distribution or use of this document is strictly prohibited without the written consent of Ooredoo Tunisia.

The selected vendor must sign a Non-Disclosure Agreement (**NDA**) with Ooredoo Tunisia.

In no case may this RFP constitute a commitment to contract by Ooredoo Tunisia.

1.0 About Ooredoo Tunisia

Ooredoo Tunisia is a private telecommunications company in Tunisia. Set up with capital of 330 million Tunisian dinars, it was founded on 11 May 2002. Ooredoo Tunisia is part of the Ooredoo Group. It is the **largest** operator in Tunisia.

Ooredoo Tunisia has also won, for the fourth consecutive year, the '**Best Customer Service – Telecommunications Sector**' award for leveraging digital improvements to better serve customers.

In order to maintain its **leading position** in the telecommunications market and to fulfil customer's requirements, Ooredoo Tunisia has decided to embark on a new solution for bill generation.

2.0 Definition and Scope

Bill Generation solution is a core component in Ooredoo Tunisia's billing system. The role of this entity is to produce customer bills in PDF format.

Facing the new customer requirements, Ooredoo Tunisia targets to renew the bill generation solution.

2.1 The Bill design

The current bill design did not change since years. For customer satisfaction, new design is requested.

2.2 The Technical solution

In addition to the bill design, the technical solution needs to be optimized.

The current bill generation solution has several limitations:

- Slowness of document generation process
- Complexity of design changes implementation: Any change requires a hardcoded update.

3.0 Goals and Objectives

The purpose of this document is to solicit responses from identified vendors to **provide and implement** a Bill generation solution based on the requirements identified in this document.

Ooredoo requires an **industrialized IT solution** (standard, preconfigured, fully automated, scalable and reliable solution)

The solution must satisfy the envisaged business and technological values of this initiative as follows:

1. Functional area:

- Modify the bill design to fit the business requirements
- Have a **rich and complete bill** by supporting any future bill design changes
- **Faster time to market by** provide full automation and full integration capabilities

The attached document (*2022_DSA_RFP Invoice Revamp.pdf*) describe in details all the business requirements with examples of the target bill design

2. Technical Area:

- Provide graphical interactive interface for bill design customization
- Produce unified XML file for each bill
- Insert bill details in Data Base tables (needed for statistics, ...)
- Produce bill in PDF Format
- Send bills by email
- Produce and send call details in CSV Format
- Create a single PDF bill for several invoices (for splitted large accounts)

- Provide web application for proposed solution management (Managing, running, monitoring, and reporting)

3.1 Main Pain Points

By satisfying the above goals and objectives, Ooredoo want to address the main pain points as follows:

1. Technical limitation and lack of flexibilities for extensions and evolutions of bill design

2. Performance issues

- a. PDF bill generation very slow (20k bills / Hour)
- b. High usage of server resources (CPU/Memory)

3. Splitted Large account bill generation

Some large accounts are not billed in only one root customer, so they are splitted into several roots (large accounts) and later only one PDF invoice is manually created to be sent to the customer. Ooredoo request to automatically generate a single PDF bill for the splitted large account roots

4.0 RFP Respondent Instructions

4.1 Contact Person

All communications for this RFP should only be done through Ooredoo Tunisia's Sourcing System (IVALUA Sourcing).

4.2 Confidentiality

All documents and/or information released by Ooredoo Tunisia in the framework of this RFP shall be treated as confidential information. No part of the document and/or information may be disclosed to any third parties without specific and written agreement by Ooredoo Tunisia except as permitted below. Relevant and parts of this RFP may be disclosed to sub-contractors or contracted participants provided that the non-disclosure obligations placed upon participants are applicable to the third party concerned, and these obligations are the responsibility of the participants.

5.0 Responses

5.1 Respondent Deliverables

All respondents shall send one (1) electronic copy of their responses to Ooredoo Tunisia Sourcing System (IVALUA Sourcing).

Note: Marketing brochures will not be considered as responses. Such material must be submitted separately, and may or may not be reviewed by Ooredoo Tunisia. Marketing materials must not be used as a substitute for written responses.

It is the Respondent's responsibility to deliver their responses on. Responses received after the time specified will be considered late may be disqualified.

5.2 Deliverables Format

The respondent should submit their response as per below format:

Deliverable	Format	Document Name	Folder Name
1. The 'Company Profile' containing the following: - Company profile as requested in the Bidder Company Background section. - A list of the work done previously related to similar implementations in the domain. - Responsibilities carried out at least during the last years <u>as requested in the References section</u>, in the subject domain, including the names of clients.	PDF	01.CP_VendorName	/VendorName/Main
2. Overall Solution Concept including Technology platform and products.	PDF	02.Solution_VendorName	/VendorName/Main
3. Requirements Compliance Matrix for the following areas: - Functional requirements - Technical requirements - Operational requirements - Security requirements - Infrastructure requirements	MS Excel <i>(Please use the attached excel file)</i>	OT Bill Generation solution Requirement v1.xls	/VendorName/Main
4. A detailed response to Ooredoo's Goals and Objectives (business requirements)	PDF		/VendorName/Main
5. Detailed responses for requests described in the following sections: - Implementation section - Training services section - Support & maintenance section	PDF	08.IMP_VendorName	/VendorName/Implementation
6. The Product/Solution Licensing Model based on the requirements in the Licensing Model Section	PDF	09.LM_VendorName	/VendorName/Main
7. The Vendors/Third Parties/System Integrators you may be partnering with	PDF	10.ThirdParty_VendorName	/VendorName/Others
8. Highlight any key assumptions or additional value-add	PDF	11.KA_VendorName	/VendorName/Others
9. Any additional information you deem necessary to support the RFP response	PDF	12.ADD_VendorName	/VendorName/Others

5.3 Compliance Matrix

5.3.1 Requirements Definition and Compliance

- The Compliance matrix defines the functional/non-functional requirements for equipment/software to be offered and services to be rendered.
- The vendor shall respond to the requirement specifications clause by clause, using a compliance summary statement, and will be submitted as described in Deliverables Format Section

5.3.2 Compliance Definition

- The compliance column of the compliance summary statement shall contain one and only one of the following acceptable compliance statements.

Compliance Statement	Meaning
Fully compliant	The offered equipment/solution/service is fully compliant with the requirement of the clause
Partially compliant	The offered equipment/solution/service doesn't fully comply with the requirement of the clause or still under development
Not compliant	The offered equipment/solution/service does not strictly comply with the requirements of the clause.

- If “no compliant” is stated for any clause, the equipment/software/service will be assumed not to comply.
- For purpose of compliance verification, a document and page number cross-reference shall be given (where applicable) in the reference column of the compliance summary statement.
- Any clause marked with “fully comply” in the Vendor’s compliance summary statement is binding on the successful tender to supply equipment/functionalities that meets the requirements of that clause. This applies for the lifetime of any awarded contract.

5.4 Technical Vendor Selection and Evaluation Criteria

Bidder is required to respond to each of the requirements in the requirements sheets with the proposed solution compliancy as detailed above.

Ooredoo Tunisia technical evaluation committee has the right to excluded from tender evaluation if one of the below items is true:

1. Not in Compliance with **eligibility criteria** (see Financial Performance section)
2. Not in Compliance with **references criteria** (see References section)
3. Solution is based on old or obsolete technologies
4. Solution deemed to be not satisfying the envisaged business and technological values of this initiative described in this document
5. Is “Not Compliant” with any of the main scope items detailed in this document

In case the bidder is excluded based on the above then:

1. The commercial offer will not be opened / considered
2. Will not be allowed for a second submission

5.5 Licensing Model

- The vendor shall provide the following details regarding the Licensing Model:
- Solution licensing model and scheme in details, mentioned the variant available models (example: Tiered, PAYU, Named, Floating, Users, Modular, etc...)
 - The corresponding estimated License cost according to each model and scheme.
 - Each Module estimated cost and license scheme.
 - Annual maintenance and technical support model
 - Proposed release must be supported at least for 3 years
 - Modules Dependency.

6.0 IT architecture description

This section presents a high-level description of the current IT landscape in Ooredoo and the integration flows between the bill generation solution and other systems.

The given information is indicative of the AS IS architecture and could be modified at any time.

The bill generation solution transformation project will include an architecture revamp aiming to enhance the IT agility and flexibility. The detailed target architecture will be agreed in the first phase of the project and could present some differences with the architecture presented here.

6.1 High level IT landscape

The following diagram is a high level functional representation of the current IT landscape. The diagram is not exhaustive; some applications may be omitted for simplification purpose.

BGH is the current bill generation tool used in Ooredoo Tunisia’s project

6.2 Application portfolio

This table presents the current application portfolio. Only major applications are represented.

Domain	Scope	Vendor / Application
Billing	Bill Calculation	Ericsson BSCSIX R3 (BCH)
	BSCS DB	Oracle DB Release 11.1.0.7
	Bill generation	BGH

6.3 Target Architecture

The target architecture of proposed solution must be on disaster recovery mode (Active-Active or Active – Passive) based on Ooredoo infrastructure standards

Bidder must provide a web application for proposed solution management (Managing, running, monitoring, and reporting)

7.0 Bill generation Requirements

The detailed requirements for bill generation solution RFP are grouped in two domains as following:

- Functional requirements
- Technical requirements

7.1 Functional requirements:

The Functional requirements are outlined (but not limited to) in the attached file:

“2022_DSA_RFP Invoice Revamp.pdf”

7.2 Technical requirements:

The Technical requirements are outlined (but not limited to) in the attached file:

“OT Bill Generation Solution Requirement v1.xls”

8.0 IT Infrastructure:

Selected Solution shall follow the Ooredoo Tunisia Process, Ooredoo will be providing all the required hardware to host the solution. Bidders will respond to the IT requirement in the SOC considering the above details and will be responsible to fill in the infra resources details based on the application requirement. These requirements will be used to allocate compute, network, and storage resource from Ooredoo Tunisia private cloud for the project. For the avoidance of doubt, Bidders will request required infra resources and Ooredoo Tunisia will be responsible to provide required hardware for the solution deployment.

The required Infrastructure Cost will be part of TCO evaluation of the solution.

9.0 RFP Schedule

Delivery Instructions

It is the bidder’s responsibility to deliver their proposal on, or before this deadline. Proposals received after the time specified will be considered late and may be disqualified at Ooredoo’s discretion.

Completion Instructions

Bidders are responsible for making a careful examination of the scope of this RFP and to comply with all terms and requirements. Bidder must supply concise responses to the requirements within this document. References to external documents or Web sites will not be considered. Failure to address any of the requirements in this RFP could subject the Bidder’s proposal to rejection.

It is very important that all bidders respond to all requirements and questions in the same order as

identified in the respective Sections. Bidders who do not respond in the correct order of sections will be rejected.

All bidder responses to this RFP become the property of Ooredoo. We reserve the right to use any information in this proposal to Ooredoo benefit.

The RFP number must be identified in your proposal, and the proposal must be signed by an authorized official of your company.

Ooredoo reserves the right to issue revisions in writing to this RFP at any time prior to the closing date.

Standard Provisions

Proposal submitted in response to this RFP should not be construed as an obligation on the part of Ooredoo to award a purchase order and/or contract. Proposals submitted in response to this RFP will be considered firm offers for a period of 30 days from bid close date. However, in the event Bidder reduces the price of any item or service provided in their initial bid responses, Bidder agrees to immediately pass these reductions on to Ooredoo by submitting a revised proposal.

Bidder **warrants that prices provided** in your proposal **are no greater than prices being charged any other customer** for similar items, quantities and schedules with similar specifications.

10.0 Bidder Company Background

Bidder should provide a brief overview and history of the company.

Bidder should also describe the company organization and include specific data outlined below:

- Bidder Company name and address
- Contact name, title, address, email, phone
- Headquarter address (if different)
- Local sales address (if different)
- Years in business under this name
- Previous company name(s)
- Years in business under previous name(s)

11.0 Warranties

Bidder represents and warrants that:

- It has full power and authority to execute, deliver and perform its obligations under this RFP entered into pursuant to its terms;
- The Services will be provided in accordance with Good Industry Practice;
- It will, throughout the Term, maintain an adequate number of personnel to perform the Services, and such personnel will be suitable, appropriately qualified, experienced and competent personnel;
- It will ensure that turnover of personnel providing the Services will be limited to 5% (five per cent) in the first Contract Year, and 10% (ten per cent) in the second Contract Year;
- Any Deliverables will comply with these relevant specifications and any other relevant requirements and shall be of satisfactory quality, free from design and other inherent defects and fit for their intended purpose;

12.0 Financial Performance

Bidder should provide a financial performance summary including:

- Financial information on your company, i.e. annual report.
- Profit growth history for the past three years.

- Average ratio of implementation services versus annuity business (for example, maintenance contracts).

Eligibility criteria

Only legal persons who:

- Justify the legal, technical and financial capacities required;
- Having an existence of at least 5 years on the final date of submission;
- Are in a regular tax situation for having subscribed their declarations, settled the sums due or in the absence of payment, constituted the guarantees deemed sufficient;
- Are certified **ISO 27001** is recommended.

The following are not eligible to participate in this consultation:

- Legal persons in compulsory liquidation;
- Persons in receivership, unless special authorization has been issued by the competent judicial authority.

13.0 Costs

Budgetary Pricing Estimate

Bidders should provide:

- Budgetary quote to implement the bill generation solution based on the requirements documented in this RFP.
- Detailed, itemized pricing model with all applicable fees for support services, professional services, integration, and customization.
- Any travel or other costs should be identified separately.
- Offer must include 3 years maintenance support
- Annual maintenance costs beyond the 3 years warranties for the 4th and 5th year should be identified as separate charges.

Total Cost of Ownership

Bidder should provide the estimated three years total cost of ownership for the proposed solution and should provide details of calculation process.

14.0 Implementation

Overview

Provide a brief overview of your professional and integration services organization while specifying the following topics:

- The schedule of the transition process and the hand over
- The project team that will take over the transition: team members should be suitable, appropriately qualified, experienced and competent personnel
- Roles and responsibilities of proposed team members
- Team members should be **solution certified**: provide copies of certifications
- Onsite Vs Offsite activities
- Skills transfer and hand over to Ooredoo Tunisia teams
- Deliverables

Methodology and Tools

Bidders to include a description for the methodology, tools used to manage the project, change control procedures, and common communication methods.

15.0 Training Services

Bidders should provide training services and methods for delivering theoretical and practical trainings while taking into consideration following requirements:

- Training should be provided for both engineering and support technical teams. At least 8 persons
- Training and training materials must preferably be in French. It will also be Vendor responsibility everything needed for the availability of training environment. For the launching phase, the courses should be run in Ooredoo locals by the Supplier instructor.
- Qualified and experienced instructors must give the lectures in the courses.

The vendor should provide with a Training plan, Training material and execution for all the functional areas that are part of the scope. Schedule may be adjusted based Ooredoo plans.

Ooredoo expects also list of suggested external training if applicable.

16.0 Support & maintenance

Bidders should clarify and describe the strategy and scope regarding support and maintenance of the bill generation solution while taking into consideration following:

- Describe bidder role and responsibility and provide a **RACI Matrix**
- Provide **Escalation Matrix** in case of **unavailability**
- Provide details about **support Software**, Average **response time SLA**, **contact channels** (phone/email/portal/etc.).
- Type of issue tracking system
- Availability of on-site support and troubleshooting
- Average response times for bug fixes and enhancement requests

Service / Case Type	Category	Action	SLA
			Response
Emergency	Critical	Initial Response	1 h
		Restoration-workaround	1 WD
		Final Solution/Correction	3 WD
Trouble Resolution		Initial Response	1 h
	Major	Workaround	1 WD
	Prio1	Final Solution/Correction	5 WD
		Initial Response	1 h
	Medium	Workaround	1 WD
	Prio2	Final Solution/Correction	10 WD
	Minor	Initial Response	1 H
	Prio3	Final Solution/Correction	2 weeks

Local/ offshore teams

During the project and after the launch, the Vendor must have a local support team or displacement capacity to act when requested to meet any Ooredoo need.

17.0 References

Bidders responding to this RFP **must have** experience in Telecommunication sector.

Classification : **Internal**

Bidders are requested to provide:

- A copy of its **ISO 27001** certification if exists
- List of **Two reference accounts** for similar project in **Telecom operators** during **last 10 years**
- Include the **company name, contact name and title, phone number, email address** and brief project description **for each reference**.

References must be willing to discuss the technical and performance aspects of the Bidder’s installed solutions(s) with Ooredoo.

18.0 Glossary

Abbreviation	Meaning
BSCS	Ooredoo Billing System
AD	Active Directory
B2B	Enterprise and Professional clients
B2B2C	End users of the business range can benefit from the advantages of established agreements.
B2C	known as residential clients
CA	Revenue
YTD	Year to Day

19.0 Human Resources Requirements

Bill Generation Solution — Personnel & Staffing Requirements

In addition to the technical and functional requirements outlined in this RFP, Ooredoo Tunisia requires that the vendor's project team meets the following Human Resources (HR) criteria. All team members proposed for the implementation and support of the Bill Generation Solution must satisfy the qualifications listed below.

19.1 Required Position

Position	Description	Mandatory
Network & Billing Systems Engineer	Senior engineer responsible for the integration of the Bill Generation Solution with Ooredoo Tunisia's existing billing infrastructure (BSCS/BCH, Oracle DB). Must have hands-on experience with telecom billing platforms and network protocols.	Yes

19.2 Minimum Experience

Each proposed team member assigned to the Bill Generation Solution project must demonstrate a minimum of **5 (five) years** of professional experience in the following domains:

Domain	Minimum Years	Details
Network Engineering	5 years	Design, configuration and operation of IP/telecom networks
Telecom Billing Systems	3 years	BSCS, BSS, OSS, billing platforms integration
Enterprise Software Integration	3 years	XML, PDF generation engines, database connectors (Oracle)

19.3 Required Certifications

At least one (1) member of the proposed team must hold the following certifications. Copies of certification documents must be provided with the proposal.

Certification	Issuer	Level	Mandatory
CCNA — Cisco Certified Network Associate	Cisco	Associate	Yes
CCNP — Cisco Certified Network Professional	Cisco	Professional	Yes
ISO 27001 Lead Implementer/Auditor	ISO/IEC	Professional	Recommended
ITIL Foundation	Axelos	Foundation	Recommended

19.4 Required Technical Skills

The proposed team must collectively demonstrate proficiency in the following technical skills relevant to the Bill Generation Solution integration within Ooredoo Tunisia's infrastructure:

Skill / Technology	Category	Proficiency Level
Cisco IOS / IOS-XE	Networking	Expert
BGP (Border Gateway Protocol)	Networking	Advanced
OSPF (Open Shortest Path First)	Networking	Advanced
Oracle DB / SQL	Database	Intermediate
XML / PDF Generation (iText, XSL-FO)	Development	Advanced
Java / REST API Integration	Development	Intermediate
Linux / Shell Scripting	System	Intermediate

19.5 Academic Formation

The project lead and key technical team members must hold a minimum academic qualification of:

Degree	Field of Study	Equivalence	Mandatory
Bac+5 / Master's Degree (5-year)	Computer Networks / Telecom Engineering	Engineer / MSc	Yes
Bac+3 / Bachelor's Degree	Computer Science / IT	BSc / Licence	Minimum accepted

Note: Bidders must submit CVs for all proposed team members along with their proposal. CVs must clearly indicate education level, years of experience, certifications held (with copies), and relevant project references. Failure to comply with the HR requirements above may result in disqualification of the bid (see Section 5.4 — Technical Vendor Selection and Evaluation Criteria).
